

Q: Why Supplement with VEMMA's Essential Minerals?

A: VEMMA's Essential Minerals® provides what the modern, convenience-driven diet may be lacking: over 65 major, trace and ultra-trace minerals in an ionic liquid form. The minerals are extracted from nutrient-dense plant vegetation that has been undisturbed for thousands of years. Then they are broken down into a bioavailable (body-ready) ionic state. This means the minerals are reduced to the smallest component that minerals can exist in and still retain their physical properties and are suspended into a completely dissolved liquid form. The result is a 100% ionic liquid mineral product that is easy for the body to use. This is important because as we age, the ability of the body to handle minerals declines, so body-ready minerals can be very helpful.
